Dear Miss Freeman:

Thanks for your special delivery which came this morning and routed me out of bed at an early hour.

Has Miss MacKenzie arrived? She said she was going to be in New York this week. She said you had outlined a route which I said was O.K. Now I have decided that it would be better to start from New York. It will be better for publicity purposes and will be less expensive. You can readily see that it would get a lot of stuff in the New York papers if you start from there and if you get it in the New York papers you will get it everywhere. If you start a move like that in Boston it is not likely that the New York papers will copy. Besides, you have been paving the way for the stuff in New York and, as you say, the papers are looking for something now during the dull season.

Now here is the difficulty. The trip should, of course, be made in warm weather. The kind of stunt you will so will be a warm weather stunt. I wish you could start on August 1. Of course, you cannot if you are going to be in Washington. How soon after August 1 do you think you can start? How long do you think it will take to reach Boston?

Now about the machine. If you start from New York you really must get the machine there. It would save transportation and I was told they were cheaper there than Boston. Try the ----- quarter. There is a place on Elizabeth St. Ask any couple you see on the street or go to Elizabeth Street and ask somebody there. In Boston we find what want for \$100.00.

I have another plan to run in with the same stunt. I am going to investigate it this evening. If possible, I want to work in another publicity stunt. I will let you know about this idea later.
